

**MS-382
Program #4
Arrays**

Date Given: Wednesday, January 24, 2007

Date Due: Wednesday, February 7, 2007

The purpose of this assignment is to produce a “histogram” of values from an array. For instance if an array was passed to a `histogram()` method, running the program should produce output that appears as follows:

Index	value	Histogram
0	0	
1	3	***
2	5	*****
3	9	*****
4	7	*****
5	4	****
6	2	**
7	0	

Use all that you have learned (methods, loops, if logic, and arrays) in your final work.

As usual, turn in a complete report and working code in email attachments to blessing@msoe.edu.
