

MSOE EECS Department

CE-1900: Lab 1 Grading Checklist

Dr. Durant

Name: _____

Item	Points
All prelab questions	/ 25
Printout of your schematic diagram from Quartus	/ 25
Printout of your simulation results from Quartus. Be sure to print the "Simulation Report" with the output filled in, not the VWF file, which is the input to the simulation and shows unknown values for the output. In the print dialog, click Options and set an appropriate time range to show the outputs of the circuit for all inputs from 000 through 111.	/ 25
Demonstration: show the instructor your simulation results in Quartus	/ 25
FAST entry (not graded this week – lab 1 time will be checked when lab 2 is graded; see link in the Lab section on the course homepage: http://myweb.msoe.edu/durant/courses/ce1900/)	/ 0
Total	/ 100

Note: Although you should be able to complete and turn this in during the week 2 lab period, it is not due until 5 PM on Friday of week 2. This is to give students who have trouble installing the software enough time to complete the tutorial. If you cannot find the professor, you can submit your lab in his mailbox in L-350. Most labs will be due on the day that they are built (*e.g.*, week 3 lab will be due at the end of the week 3 lab period). **Staple** this lab cover sheet to all the materials you are submitting. Make sure you've done everything listed above. Extra copies of lab checkout sheets are available on my CE1900 website.
